# FAST AND EASY GEOGRAPHIC DATA ANALYSIS

RICH, INTERACTIVE MAPS AT YOUR FINGERTIPS.

The Izenda Maps add-on provides interactive geographical visualization to the report and dashboard experience. Go beyond tables and charts and show users what the world really looks like. In today's rapidly changing business climate, it's critical to see where change happens.

HOW DOES IT WORK?

After adding a special license key and DLL, a maps tab will appear in the report designer. Here you can specify what fields, functions and subreports should be used for the shading, indicator bars and interactivity.
